

MY COOK BOOK &

ABOUT:

YOUR AI CHEF ASSISTANT

WHAT'S NEW IN VERSION 3.0?

- 1. Tailored themes for every mood Customize cookbook with a selection of stunning themes. Pick from cozy, rustic, vibrant, or minimalist designs to set the perfect mood for your cooking journey!
- 2. Smart recipe filters Narrow down recipes by cuisine, cooking time, or dietary needs to discover exactly what suits your taste.
- 3. Print-ready weekly meal plans Add recipes to your schedule and plan out your meals for a hassle-free meal prep. Create and download your shopping list for organization and ease of cooking.
- 4. Voice-guided instructions Select from a range of voice options to guide you while you cook and make the process more convenient than ever!
- 5. Quick social sharing Quickly share your favorite recipes with friends and family on platforms like Discord or WhatsApp, and find answers to common questions through accessible FAQs.

NITH 70+ TEST CASES & 80% TEST COVERAGE!

WHAT'S COOKING NEXT!?

1. Favorites Page - (Week 1)

A standalone page that allows users to save recipes they enjoy or would like to try out in the future. This will be individual to the user, which they can easily access through their profile and revisit anytime.

2. User-generated recipe submissions - (Week 2-3)

Enable users to create, submit, and share their own recipes on the platform. Develop a recipe submission form with fields for ingredients, instructions, images, and tags, etc. This will require a redesign of the basic user profile system to allow attribution of recipes to their creators.

3. User engagement features - (Week 2-4)

Build a social-media-style feed where users can explore new recipes. Introduce likes, comments, and shares to promote user interaction. This will also revamp the recipe rating system based on number of likes and help
